SERVAX

A Social Media for Smart People

Introduction to Serva X
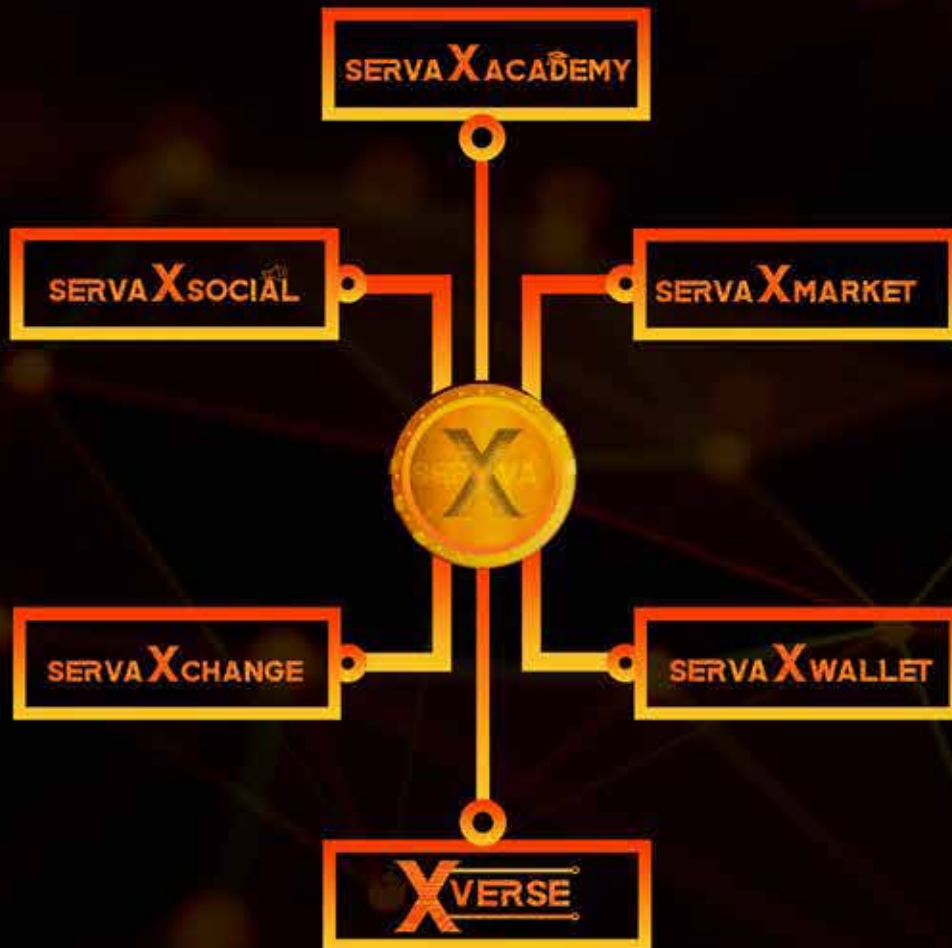

Serva X WHITEPAPER

ServaX is a social media platform for smart people. We want to create an ecosystem where people can communicate and transact. Communications on ServaX are of Financial and intellectual gain. We don't condemn any other platform, we are unique in what we offer - an Environment for smart conversations and actions. ServaX takes you on a journey to financial freedom and intelligence.

In a layman's terms we are creating an application where people can communicate and also trade (Exchange), send, receive and swap currencies (wallet and DEX), sell (NFTs) etc all on the same platform while doing this with real time communication within users.

SERVA X ACADEMY

This is the learning platform of ServerX. This is the free learning platform where users of ServaX can learn and develop themselves in every area of their financial lives and there will also be certifications on completions. Expert users in various fields in finance and its related technologies will contribute to this platform and earn rewards intokens. ServaX Academy has its Allocation in tokenomics. Education is our priority.

SERVA X SOCIAL

This is the interacting and communication arm of ServaX. It is a micro blogging site. It is going to be end to end encrypted. And we will be keeping the source code public when the platform is completed. We would be employing the best security measures to secure user communications and operations are private and secured. Other features include Video conferencing, Audio conferencing, Essay Papers for researchers. Users can add, follow and react to other users. The community decides on content moderation and free speech.

SERVA X WALLET

With ServaX Wallet, users can now check prices, trends, and other trading parameters for all tokens of interest on the wallet's in-built chart feature. Users can store their NFTs on this multi Chain wallet. Users can surf real-time token charts without the need to visit website charts. With industry leading security measures, it will be safe for all users. Users can send tokens within the ServaX ecosystem at lightning speed.

SERVA X MARKET

Create, Sell and Store Your NFTs on ServaX. People can find NFTs for each users since each user with an NFT has a direct botton on his Collection. Efficient fast and secure payment system etc.

SERVA X CHANGE

Using an Effective Order Matching Engine (OME) we will be able to carry out upto 1,500,000/sec. Features such as ServaX fiat, Spot, Features, Margin Trading, decentralized Exchange and More. ServaX will feature the lowest Trading costs and fees.

X VERSE
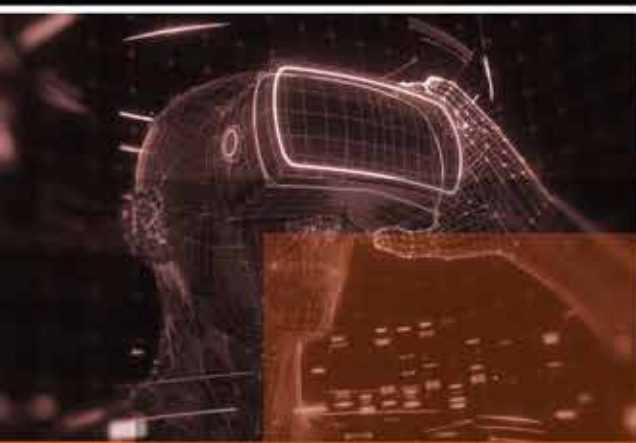

Our Metaverse project focused on Agriculture and food production.

ServaXNFTs - Gateway Ticket

Server NFTs use cases aside from staking which comes up in the future is; when users purchase ServaX NFTs and hold them they automatically get free access to all paid services on ServaX without paying a fee. The NFTs come in Bronze, Silver, Gold and Platinum Value. Several Utilities will surface as we journey.
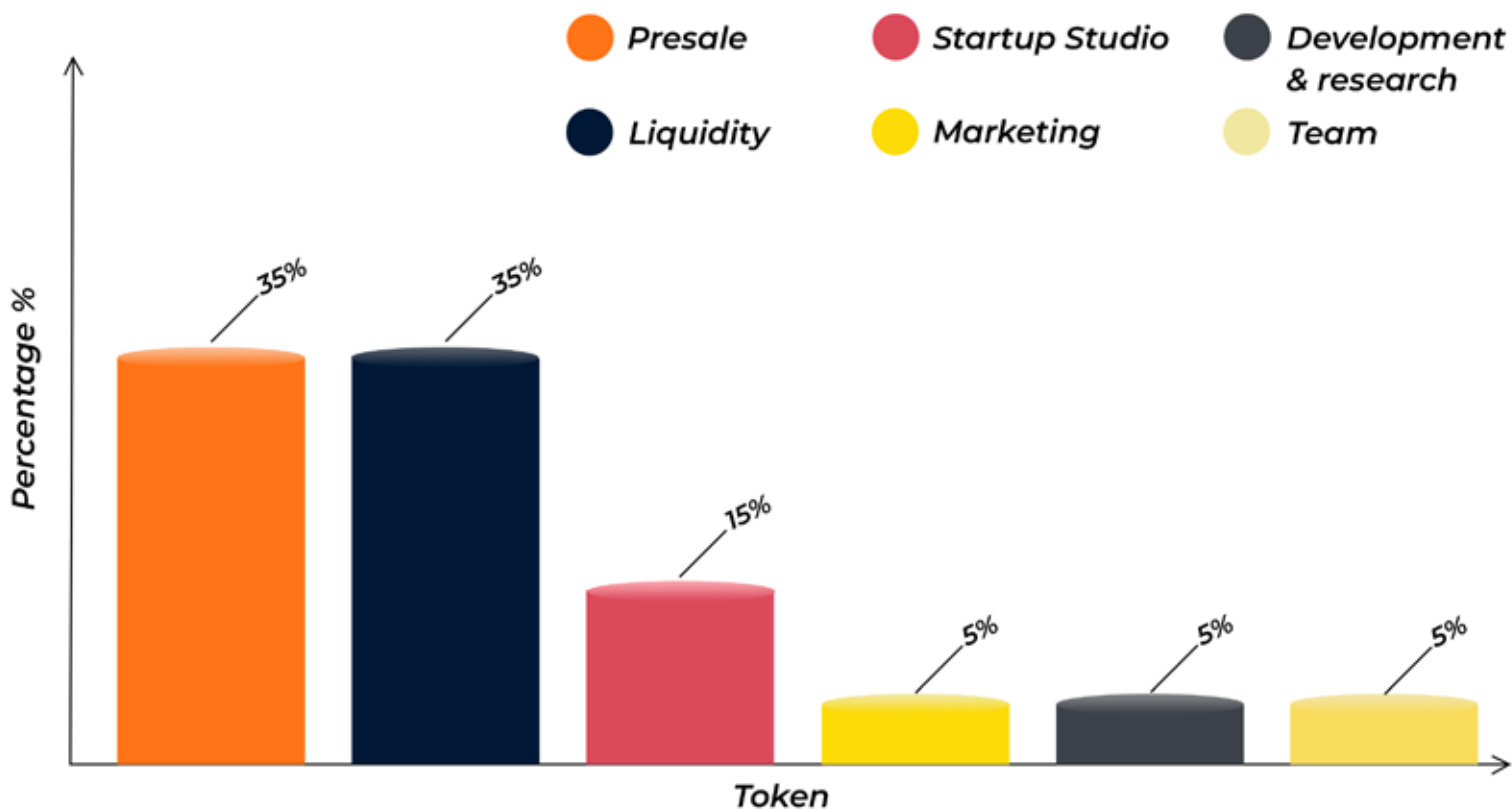

Network Marketing

ServaX is about a network of smart people communicating and transacting at the same Time. Because of this we are creating incentives for people who would refer other people to ServaX. They will be rewarded in ServaCoin. The value of the Incentives increases as the value of ServaCoin increases and the number of ServaCoin decreases as the Value increases. To ensure continuity. This unique group of people are called ServaReps.

XToken

ServaX will have a governance token - ServaCoin, Created on the Bitgert Chain. ServaCoin total supply is 200,000,000. Here is the tokenomics
